Responsible AI Management – Governance, Risk Management & Compliance (GRC)

This ChatGPT training is specifically focused on responsible AI management, covering governance, risk management, and compliance. You will gain insight into current developments in AI and learn how to apply governance frameworks and ethical principles in practice.

Training duration
This one-day training course consists of six effective teaching hours.

Target group
This training is designed for accountants, financial professionals, policymakers, AI officers, and other roles involved in risk management, legislation, and AI-related policies.

Starting level
Prior knowledge of ChatGPT is required. For example, by completing our "ChatGPT for end users" training or through regular use of AI tools in daily work.
